Quill for Teams

Quill for Teams adds shared notebooks, roles and an admin console to the desktop and mobile apps. Every member keeps their own private notes as well.

Sharing a notebook

You can share a notebook with up to fifty people. Each person gets one of three roles, and the owner can change a role at any time from the sharing panel.

- Owners can invite and remove members.
- Editors can change any note.
- Viewers can read notes but not change them.

```
quill share --notebook Recipes
quill members --notebook Recipes
```

Offline access

Shared notebooks are cached for thirty days on each device, so members can read and edit them without a connection.

Edits made offline upload when the device reconnects.
